

JOURNEY OF A GUIDE DOG

I live in the Breeding Centre with my mum and siblings until I'm eight weeks old! Here I start finding my feet and learning about the world around me.

I'm so excited to go and live in the community with my Puppy Raiser! My new family takes me on lots of outings so I can gain new skills and experiences.

I return to the kennels to start my formal training when I'm about 18 months old. My trainer teaches me everything I need to know to be a great Guide Dog!

After five months of training I'm ready to start the job I was born for! My handler is carefully picked from the clients on our waiting list to make sure we're the paw-fect match.

My new handler and I receive training together to help us become a great team in no time. I love being a guide and companion to my new best friend!
